

Governance & Compliance - Automotive Market Training Services

Our mission is to provide consultancy, helping the automotive companies to obtain the compliance for the international standards (ISO 26262, A-SPICE and CMMI) and for the developing and the procurement of products conforming to these standards.

We support customers in developing a strategy for the safety and compliance of automotive products by managing the changes resulting from the new standards or new editions of standards. An essential item of these services is the training.

01	<p><u>Introduction to ISO 26262</u></p> <p>A short but complete presentation of the 10 volumes of the ISO 26262 norm. All main concepts are defined with some examples of templates of documents.</p> <p><u>It includes:</u></p> <p>In class training based on presentation of slides</p> <p>A test to verify training effectiveness</p> <p><u>Duration</u></p> <p>1 day</p>
