

Governance & Compliance - Automotive Market Services

Mission

- Our **mission** is to provide consultancy, helping the automotive companies to obtain the compliance for the international standards (**ISO 26262, A-SPICE, CMMI**) and for the developing and the procurement of products conforming to these standards.
- We support customers in developing a **strategy for the safety and compliance of automotive products** by managing the changes resulting from the new standards or new editions of standards.

Services

- **Adoption and implementation of technical standards** and relevant updates
- **Adoption of standard by migration** from standards currently used by the Company (e.g. from A-SPICE to ISO 26262) **through the use of the AIDA model**
- Definition of processes not fully standardized (e.g. **Programmable Devices**)
- Support to **assessment** of products (ISO 26262) and for **incoming audits** and/or **supplier audits**
- **Training** on Quality, RAMS, and IT standards and methodologies
- **Development, verification and validation** of software and hardware products in accordance with standards
- **Reverse compliance projects** in which the product is given but the documentation must be prepared in compliance with applicable norms
- **Qualification of tools** in accordance with ISO 26262.

Competences

Norms and standards:

Quality Management Systems:

ISO 9001

Automotive Standards:

ISO/TS 16949, ISO 26262

Improvement Models:

CMMI

Testing Laboratories

Accreditation:

ISO 17025

Functional Safety

Standards:

IEC 61508, IEC 61511

Methods and techniques:

Hazard Analysis & Risk Assessment, Fault Tree Analysis, FMEA, Prince 2, UML, SA/SD, Petri nets.

Tools:

Aonix StP, MagicDraw, Polarion, Telelogic Doors.
